

FoodCraft was created to offer consumers & businesses a superior choice of quality specialty ingredients & blends, customized packing, fresh frozen food products & more, all tailored to the customer's preference.

Specialty Ingredients

Innovative ingredients & modern additives with proven nutritional properties that can offer greater benefits to meals, formulations, food concepts & such.

Combining specialty/ functional food ingredients with experienced production knowledge, we strive to meet all your formulation goals. Whatever your requirements are for blended premixes, we ensure that our specialty ingredients are specially tailored to your needs.

Blends & Premixes

Expert formulations of distinctive blends & premixes from skilled food scientists ensure properly balanced foods & beverages with a firm mouth-feel & a smooth taste.

We custom formulate premixes to include functional ingredients such as fibers, gums, amino acids, proteins, flavours & seasonings that can fortify everyday food items so that maximum benefits can be derived from combining multiple ingredients into a single blend.

Customized Packaging

Our food ingredients that are normally sold in bulk are now available in repacked convenient sizes & retail-sized packs for various applications, meeting the needs of smaller businesses or SMEs.

Whether liquid or solid (dry, chill or frozen), we have a variety of packaging options from small individual pouches to kg-based packs.

Saving time & cost, as well as reducing inventory are important for production speed & efficiency. At FoodCraft, we use our years of experience to provide for a variety of industries & consumers, ensuring a reliable & steady supply of expertly crafted blends.

Functional Ingredients for various food applications

Innovative & functional ingredients can be used in various applications such as **bakery** products, **beverages** (juice & malt-based applications), **ice creams**, nutritional **supplements** & more.

Expertly Crafted Blends & Premixes

With mixes designed for different kinds of foods, our blends can provide **specially formulated** or **nutritionally enhanced** premixes & blends for various applications including chocolate or malt-based drinks, juices, baking products, food seasonings, as well as products requiring superior sugar

Quality Frozen Food Products

Individual Quick Frozen (IQF) foods retain virtually all the beneficial properties of fresh items & has greater **convenience in handling & preparation**. Bursting with taste & flavour, our IQF frozen fruits can be added into **desserts, dairy & beverage applications**. Whole, chopped or sliced depending on your preference, our IQF products are available in bulk or customised batch packs.

Freshness & Convenience

Meals that are made to Grab&Go

Made for hungry **on-the-go** consumers who require a quick & appetizing meal in-between their busy schedules. We understand the hustle & bustle of city life and that is why all our meals have **convenience** in mind.

Guaranteeing Freshness

Ready-to-eat meals have to be **safe** to eat & **fresh**. That is why we guarantee a safe & healthy bite every time you Grab&Go. All our meals are carefully **sealed** using a special sealing technique that keeps pathogens and harmful bacteria away.

Our Grab & Go sandwiches are available in **various gourmet varieties** with more ready-to-eat meals coming really soon.

Tasty on-the-go meals for that rumbling in your tummy

Why You Should Grab&Go :

- Carefully Sealed Sandwiches

All our sandwiches are carefully sealed using a special sealing technique that **keeps bacteria and harmful pathogens away from our sandwiches!**

- Hygienic

When carefully sealed, finely balanced gas mixes **slows down the product's aging process** that results from deterioration, spoilage and rancidity.

- Freshness

The sealing technique **slows down ongoing biological processes**, thus providing preservation WITHOUT requiring the ADDITION of HARMFUL chemical preservatives.

All this so YOU CAN REST EASY whenever you Grab&Go
